Profile

B.Tech student in **Artificial Intelligence & Analytics** with hands-on experience building **AI/ML-powered applications** and full-stack backend systems using **Python (FastAPI)**, **Node.js/Express.js**, and **REST APIs**. Skilled in **Machine Learning**, **NLP**, and **LLM integration** (Google Gemini), with strong foundations in **DSA**, **DBMS**, **OOP**, and cloud basics (**AWS**). Proven internship experience in **Agile** teams using **Git**, **GitHub**, and **Jira** to deliver production-ready features.

Technical Skills

Programming: Java, Python, JavaScript, TypeScript, SQL
AI/ML: Machine Learning, NLP, LLM Integration (Gemini API)
Backend & APIs: FastAPI, Node.js, Express.js, REST APIs, JWT Authentication
Frontend: React.js, React Native
Databases: MongoDB, SQL, Database Design, Data Modeling
Cloud: AWS (EC2, S3 – basics)
Tools / Concepts: Git, GitHub, Postman, Agile/Scrum, SDLC, DBMS, OOP, Problem Solving

Internship Experience

Software Developer Intern **June 2025 – July 2025**
Elevati Infotech Pvt. Ltd. *Pune, India (On-site)*

- Built application modules using **React.js** and **React Native** within an **Agile** sprint cycle.
- Integrated **REST APIs** with Axios, implementing data-fetching and error-handling across app screens.
- Used **Jira**, **Git**, and **GitHub** for task tracking, sprint updates, and feature delivery.

Academic Projects

AI-Powered LLM Chatbot | *Python, FastAPI, React.js, MongoDB Atlas, JWT, Gemini API* GitHub

- Developed an **AI-powered chatbot** integrating **Machine Learning-based NLP** through **Google Gemini 2.5 Flash**, enabling multi-turn contextual conversations.
- Built a **FastAPI (Python)** backend with modular REST API routes (`/api/chat`, `/api/auth`, `/api/sessions`) and JWT-based authentication for secure multi-session access.
- Designed **MongoDB Atlas** data models for structured storage and retrieval of conversation history, supporting scalable multi-user chat management.

UNCLUTTERED – Task Management Platform | *React.js, Express.js, MongoDB, JWT, REST APIs* GitHub

- Built a full-stack task management platform for team collaboration, task tracking, workflow visibility, and role-based access.
- Structured backend workflows and data models for task assignment and status tracking, exposing REST API routes (`/api/tasks`, `/api/users`, `/api/auth`) for core operations.
- Developed secure REST APIs and authentication modules; recognized as **Best Project** by external evaluators.

HotelEase – Hotel Management System | *React, TypeScript, Node.js, MongoDB, REST APIs* GitHub

- Developed a full-stack hotel management system for room booking, billing, and guest record management.
- Built backend APIs and data workflows for bookings, room status, and customer records, defining RESTful endpoints (`/api/rooms`, `/api/bookings`, `/api/guests`) for CRUD operations.
- Designed a modular React + TypeScript frontend with component-level state management.

Positions of Responsibility

Vice Lead – Content Team **Aug 2024 – Sept 2025**
ACES Club, MIT ADT University *Pune, India*

- Led a team of 6+ writers to produce event scripts, technical reports, and promotional content for 10+ club activities.
- Mentored new writers through structured onboarding, improving collaboration and content quality.

Education

MIT ADT University **Pune, India**
Bachelor of Technology in Artificial Intelligence & Analytics | CGPA: 8.45/10 *2023 – Present (Expected 2027)*

Certifications

Introduction to Data Science in Python – University of Michigan, Coursera
PCAP: Programming Essentials in Python – Cisco Networking Academy & OpenEDG Python Institute
Data Modeling in Power BI – Coursera
Tableau for Data Visualization and Analysis – Coursera
German Language Proficiency – Goethe-Institut A1 Certificate
